PEDAGOGY / TEACHING METHODOLOGY

The teaching methodology is primarily the description of learning objective-oriented activities and flow of information between teachers and students. Often times, a particular teaching method will naturally flow into another, all within the same lesson, and excellent teachers have developed the skills to make the process seamless to the students. Pedagogy for the adolescents has given way to Andragogy "The art and science of helping adults learn" developed by Malcolm Knowles, an American practitioner and theorist of post- adolescent education, with more of practical, goal oriented and relevant with facts and figures which is now widely practiced in IIBS. This has led to the better absorption of skills by our students.

ALUMNI SPEAK

I had a great experience during the past two years of my stay at IIBS. The faculty, infrastructure, and placement are all too good. Management students can get a great education at IIBS, and college puts in a lot of effort to make every student corporate ready. Faculties encourage students to plan and organize extra-curricular activities from time to time, whose objective is to develop managerial skills in students and to provide a platform for students to showcase their skills. Overall, had a great experience and feel proud that I was part of IIBS.

Dinesh Kumar R

I joined IIBS on August 2016. It has been a great opportunity and learning experience in IIBS. Met new friends from different regions of different attitudes, lifestyles and behaviour. It was a wonderful journey. As far as the college is concerned it's good but the faculty is awesome. The main turning point would be the faculties in here.

I learned a lot in this journey. The wild and raw energy guy became a silent and gentle guy and professional channeling the energies into the right direction. The faculties have been very supporting. Nonetheless, a last note although the college plays an important role much more important is knowledge.

Rahul Viswakarma

I have had the absolute time of my life so far, the years have gone by so quickly and I have met so many amazing people here. Excellent infrastructure and faculty who teach very well. A lot of attention has been given to the individual development of students.

R P P Lawanya

Its feeling great that I am a student of IIBS. It is an institution which made me find my weakness and make me work on my weaknesses. The faculty of this Institution never treated me as a student but they did showcase their love and affection as their child. This institution made me understand that before going to a corporate we must work on our base that is the theory part which the faculty gives the utmost important. The

MOM program boosted up and made us more strong. It is the right platform to shed the inhibitions and shyness to become a complete

manager. An introvert converts into an extrovert and the magic wand is 'Surface'. Faculty members give us enough encouragement and guidance to participate in the managerial fests of other colleges, which enhances our overall outlook towards management.

Manas Pratim Deka

STUDENT'S SPEAK

I am from Chennai, Tamil Nadu. Currently am pursuing MBA in IBS Bangalore. The advantages over here are: Overall experience is really good as teachers are very friendly and are always ready to help. Faculty are so knowledgeable they are so interactive. We can gain as much as we can from them. Placements is good.

R. Varsha, MBA

It's really a great privilege to join IBS and is one of the best choice I have ever made. IBS helped me to explore my knowledge and experience to get into a corporate world.

I want to thank the management for giving me this opportunity of being a part of this great institute. It really has helped me in my career growth.

The journey started with learning programs, games, competition, and many business plans that how corporate world actually works. We worked upon different aspects of marketing, finance, and human resource in our very beginning of the PGDM program which gave us the overview of the business environment. And all these activities were possible only because of our great faculties and management team. My overall experience in IBS is really nice.

Jaweria Afroz, PGDM

IBS is one of the best Choice that I've ever made. It helped me to explore, learn and execute the best in my life. I always seek for excellence and I found it here. It's always feels great to be part of this institution and I thank the management to giving me this experience.

Telagathoti rushikesh, PGDM

Being a student of IBS is an absolute pleasure, academically and humanely. The institute provides a proper infrastructure and a great learning atmosphere that motivates us quite much for working hard and also enables us to rejuvenate amidst the study pressure. Faculty members of IBS are really friendly and provide necessary support from time to time. I really loved and enjoyed the teaching system in IBS and had wonderful Practical knowledge apart from theory.

Akshay Kumar, MBA

IBS is one of the best decision of my life. I learned so many things in IBS, before coming to IBS. I didn't know many things specially how to talk with stranger, it helped me a lot in improving my communication skill and presentation skill. Before IBS I was introvert person but now I am transformed myself to an ambivert person, I can talk with stranger little bit when I took admission in IBS Bangalore, now I know how to handle the different situation independently. Now I am more confident person I can take my decision independently.

Suniti Das

Hi, I am studying MBA in International Institute of Business Studies. The college days are amazing and good. I enjoyed each and every day here with gaining knowledge from all the experienced and good faculty members. Most importantly these two years in this college was so good that thought me good and new things which eventually helped me to focus on enriching my academic growth. Faculty is very friendly and supportive.
